

5 Reasons to Get a Biometric Time Clock.

What is it? A fingerprint time clock that syncs to your payroll software.

- 1 No more "buddy punching"**
That is when a friend clocks in for an employee who isn't there.
- 2 Make sure your labor costs are what they should be**
Don't pay for time that employees are not there.
- 3 Correct overtime calculated**
Automated syncing ensures hours are totaled perfectly, keeping you compliant and avoiding overpayment.
- 4 Eliminate "Time Theft" from long lunches**
Precisely track when breaks start and end so 30 minutes doesn't accidentally turn into 45.
- 5 Stop chasing paper timesheets**
No more messy handwriting or lost slips of paper. Data flows directly into your payroll with one touch.

The Result? Relax and enjoy labor cost control and less work on payroll day!

How to Get Started with Pink Payroll
